MP-1 CLASSIC SOUND-CHECK PROCEDURES

- 1) Make sure the unit is still hot from burn-in.
- 2) Turn unit ON & OFF 5 times, make sure fuse doesn't blow, and make sure there are no error messages.
- 3) Plug into sound-check station power amp and MIDI setup.
- 4) Verify that MIDI IN, MIDI OUT, and MIDI THRU are all working correctly by switching programs with the MIDI controller.
- 5) Sound-check the unit, paying close attention to the following:

<u>Preset</u>	<u>What to look for</u>
1	CLEAN TUBE VOICE
2	SOLID-STATE VOICE & CHORUS
4	BROWN VOICE
7	DISTORTION and NOISE GATE

- 6) Check for pops when switching from one program to another.
- 7) Check the FX loop IN/OUT function for both channels.
- 8) Make sure the character (tone) and relative volume (loudness) of each program is consistent from unit-to-unit.
